

ABSTRACT

A portable communication apparatus, such as a mobile telephone, has a display (6), a user-controlled input device (7), a memory (30), a controller (20) and a hierarchical menu system stored in the memory. The menu system has a plurality of menus, including top-level menus (100, 200, 300), sub-level menus (110, 120, 130, 140, 210, 310, 400), and a plurality of menu items (111-116, 121-123, 131-133, 141-144, 211-217, 311-313, 401-406) under respective menus. The controller is arranged to present individual menus/menu items on the display, receive selection commands from a user through the user-controlled input device and in response perform functions related to the presented menus/menu items. The memory of the apparatus has a dynamic menu (300, 310), the contents of which may be modified by the user. The dynamic menu (300, 310) is either a top-level menu or a sub-level menu in the hierarchical menu system.
